

AMENDMENTS TO THE SPECIFICATION

Page 2, line 6:

Figure 1 is a side elevational view showing the rotational spring of the present invention in the context of a rotary drive power toothbrush.

Figure 2 is a simplified diagram showing the rotational spring of the present invention in a three-legged configuration.

Figure 3 is a simplified diagram showing an alternative arrangement of the rotational spring of the present invention.

Figure 4 is a diagram showing another alternate arrangement of the rotational spring.

Figure 5 is a diagram showing another alternate arrangement of the rotational spring.

Figures 6A and 6B are cross-sectional diagrams showing alternative cross-sections of the leg members of the rotational spring.

Figure 7 is a diagram showing the connection of the leg members in the rotational spring.

Figure 8 is a diagram showing another alternate arrangement of the rotational spring.

Figure 9 is a diagram showing another alternate arrangement of the rotational spring.

Figure 10 is a diagram showing another alternate arrangement of the rotational spring.
